

# AMOGH JAGADISH TAMBAD

(480) 876-5096 | San Francisco, CA | [tambadamogh@gmail.com](mailto:tambadamogh@gmail.com) | [linkedin.com/in/ajtambad](https://linkedin.com/in/ajtambad) | [github.com/Ajtambad](https://github.com/Ajtambad)

## EDUCATION

### Master of Science, Computer Science

Arizona State University, Tempe, AZ

Coursework: Cloud Computing, Data Processing at Scale, Data Mining, Software Security

May 2025

4.00 GPA

### Bachelor of Technology, Computer Science

REVA University, Bangalore, India

Coursework: Data Structure and Algorithms, Operating Systems, Cloud Computing, Computer Networks

May 2021

3.77 GPA

## PROFESSIONAL EXPERIENCE

### Software Engineer

DriverAI LLC, Remote

Dec 2025 - Present

- Engineered **Terraform** automation pipelines for **AWS** infrastructure provisioning, implementing security controls and best practices across multiple services
- Implemented gamification features with **FastAPI** backend and **MySQL** database to increase user engagement and data collection through reward-based incentives

### Site Reliability Engineer (SRE) Intern

Arch Mortgage Insurance, Greensboro, NC

Jun 2024 - Aug 2024

- Architected log filtering and routing pipelines using **Cribl Stream** for OpenShift **Kubernetes** clusters, reducing Splunk ingestion by 40-50 GB/day ( **\$32K annual savings** ) and improving search performance by **20%**
- Automated container image synchronization between Red Hat Registry and Nexus Repository using **Ansible** and REST APIs, eliminating **90%** of manual update overhead and ensuring consistent artifact versions across environments

### System Engineer

Cerner Healthcare (Oracle Health), Bangalore, India

May 2021 - Jul 2023

- Led migration of **500TB+** enterprise healthcare data from on-prem infrastructure to AWS using **Python** and **Bash** scripts and **AWS S3**, reducing storage costs by **30%** while maintaining HIPAA compliance
- Participated in 24/7 on-call rotations, triaging P1/P2 incidents and performing **root cause analysis**, reducing mean time to resolution (MTTR) by **35%** through improved runbooks and automated diagnostics
- Troubleshoot **Jenkins** pipeline issues through root cause analysis, minimizing support ticket resolution time by **40%** and ensuring **99.9%** uptime for **CI/CD** workflows, leading to uninterrupted deployment pipelines
- Managed **300+** bi-weekly microservice deployments, using **Chef**, while also tracking them with **JIRA**, accelerating delivery of new UI and backend features in a fast-paced production environment

## ACADEMIC PROJECTS

### End-to-end Deployment Automation | AWS, GitHub Actions, Jenkins, Ansible, Bash | [GitHub](#)

Apr 2025

- Reduced deployment time by **90%** by building a fully automated **CI/CD** pipeline integrating Terraform (infrastructure provisioning), **Ansible** (configuration management), and **Jenkins/GitHub Actions**
- Implemented dynamic inventory management, automated SSH key rotation, and IAM role-based access for secure, zero-touch deployments to AWS EC2 instances

### AWS-based Face Recognition App | Python, AWS | [GitHub](#)

May 2024

- Developed and deployed a **Flask**-based image recognition app using **Gunicorn** on AWS EC2, enabling HTTP REST API based uploads and forwarding images to **S3** via **SQS** for asynchronous processing using AWS service API.
- Designed an auto-scaling app tier that scaled up to **20** EC2 instances based on **SQS** queue depth, ensuring efficient, real-time image processing under varying workloads

## SKILLS

**Languages & Scripting:** Python, Go, Bash, Java, SQL

**Cloud & Containers:** AWS (EC2, Lambda, S3, ECS, EKS), Docker, Kubernetes, Helm

**Infrastructure as Code:** Terraform, Ansible, Chef, CloudFormation

**CI/CD:** Jenkins, GitHub Actions, ArgoCD

**Observability:** Splunk, Zabbix, Prometheus, Datadog, Grafana

**Databases:** PostgreSQL, MySQL, MongoDB, Neo4j

**Core Competency:** Distributed Systems, Microservices, Incident Management, System Design, Agile/Scrum
