

# AMOGH JAGADISH TAMBAD

(480) 876-5096 | San Francisco, CA | [tambadamogh@gmail.com](mailto:tambadamogh@gmail.com) | [linkedin.com/in/ajtambad](https://linkedin.com/in/ajtambad) | [github.com/Ajtambad](https://github.com/Ajtambad)

## EDUCATION

<b>Master of Science, Computer Science</b> Arizona State University, Tempe, AZ Coursework: Cloud Computing, Data Processing at Scale, Data Mining, Software Security	May 2025 4.00 GPA
--	----------------------

<b>Bachelor of Technology, Computer Science</b> REVA University, Bangalore, KA Coursework: Data Structure and Algorithms, Operating Systems, Cloud Computing, Computer Networks	May 2021 3.77 GPA
---	----------------------

## PROFESSIONAL EXPERIENCE

<b>Software Engineer</b> <b>DriverAI LLC</b> , Remote	Dec 2025 - Present
--	--------------------

- Engineered **Terraform** automation pipelines for **AWS** infrastructure provisioning, implementing security controls and best practices across multiple services
- Implemented gamification features with **FastAPI** backend and **MySQL** database to increase user engagement and data collection through reward-based incentives

<b>Software Engineer (Infrastructure &amp; Reliability) Intern</b>	Jun 2024 - Aug 2024
--	---------------------

<b>Arch Mortgage Insurance</b> , Greensboro, NC	
• Architected a <b>JavaScript-based</b> data processing pipeline with <b>Cribl Stream</b> , processing 80GB+ daily logs through 10+ conditional routing rules, reducing Splunk ingestion costs by <b>\$32000</b> annually	Jun 2024 - Aug 2024
• Developed a container image synchronization system using <b>Python</b> and <b>Ansible</b> , integrating Red Hat Registry APIs with Nexus Repository to automate artifact management and eliminate <b>90%</b> of manual container updates	

<b>Software Engineer (Systems)</b>	May 2021 - Jul 2023
------------------------------------	---------------------

<b>Cerner Healthcare (Oracle Cerner)</b> , Bangalore, KA	
• Developed and maintained <b>Java-based</b> microservices handling 5M+ daily healthcare transactions, implementing <b>RESTful APIs</b> and event-driven architectures that reduced patient data retrieval latency by <b>40%</b>	May 2021 - Jul 2023
• Built cloud-native data transformation pipelines in <b>Python</b> to migrate <b>80%</b> of enterprise data (500+ TB) from on-premise infrastructure to AWS, designing workflows that ensured zero data loss and <b>99.9%</b> uptime	
• Engineered automated monitoring solutions using Python and <b>Splunk</b> APIs, developing custom alerting logic and incident response workflows that reduced mean time to resolution (MTTR) by <b>30%</b>	
• Collaborated with cross-functional teams to deliver <b>300+</b> microservice releases, implementing feature flags, <b>A/B testing</b> frameworks, and rollback mechanisms that improved deployment safety and enabled rapid iteration	

## PROJECTS

<b>TalkDoc - AI-based Document Filler</b>   Python, FastAPI, React, OpenAI GPT-4   <a href="#">GitHub</a>	Nov 2025
---	----------

- Built an AI-powered web application using **FastAPI** and **React** that automates document form completion through conversational interactions, leveraging **OpenAI GPT-4** for natural language understanding and intelligent question generation
- Implemented dynamic conversation flows and document generation, reducing form completion time by **40%** while achieving over **90%** accuracy in mapping conversational responses to structured document fields

<b>RAG Implementation for arXiv Papers</b>   Python, DynamoDB, CLIP   <a href="#">Slides</a>	Nov 2024
--	----------

- Devised a multimodal pipeline using **Python** to extract and vectorize content from **2000+** arXiv papers, implementing **CLIP** and text embedding models, **DynamoDB** indexing and vector database storage
- Implemented a similarity search and summarization pipeline with DynamoDB and GPT-4o mini to deliver concise, contextually relevant responses to user queries with an average response time of under **2 seconds**
- Served as project co-lead, driving technical direction and delivering the final presentation, resulting in a strong grade

## SKILLS

**Languages:** Python, Go, Java, JavaScript/TypeScript, C++, SQL

**Web & APIs:** Flask, FastAPI, Spring Boot, Node.js, React.js, REST/GraphQL APIs

**Databases:** PostgreSQL, MySQL, MongoDB, Redis, DynamoDB, Vector DBs (FAISS, ChromaDB)

**Cloud & Containers:** AWS (EC2, S3, Lambda, EKS, SQS), Docker, Kubernetes, Terraform, Helm

**DevOps & Tools:** Git, Jenkins, ArgoCD, Kafka, Linux/Unix, Ansible, Infrastructure as Code

**Monitoring:** Splunk, Zabbix, Prometheus, Cribl

**AI/ML:** PyTorch, TensorFlow, LangChain, LangGraph, RAG
