

AMOGH JAGADISH TAMBAD

(480) 876-5096 | Oakland, CA (Open to relocation) | ajtambad@gmail.com | linkedin.com/in/ajtambad | github.com/Ajtambad

EDUCATION

Master of Science, Computer Science May 2025
Arizona State University, Tempe, AZ 4.00 GPA

Bachelor of Technology, Computer Science May 2020
REVA University, Bangalore, India 3.77 GPA

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate ([SAA-C03](#))

PROFESSIONAL EXPERIENCE

Software Engineer - AWS Commercial Lead Dec 2025 - Present
DriverAI LLC, Remote

- Enforced Infrastructure-as-Code (**IaC**) practices by engineering **Terraform** automation pipelines managing 8–10 AWS services across staging and production environments, implementing **RBAC**, security controls, and architecture standards to ensure scalable and secure foundations
- Designed and implemented a gamification system with 30+ endpoints backed by **MySQL** RDS/Aurora database, introducing reward-based mechanics to drive user engagement and structured data collection for an early-stage product

Research Assistant, VISA Lab Jun 2025 - Dec 2025
Arizona State University, Remote

- Developed **FlowBench**, a workflow-based distributed benchmark by leveraging **Python**, **Docker**, **Kubernetes**, and **FaaS** principles to evaluate custom edge computing applications, providing a comprehensive report on 6+ metrics.

Site Reliability Engineer (SRE) Intern Jun 2024 - Aug 2024
Arch Mortgage Insurance, Greensboro, NC

- Architected log filtering and routing pipelines using **Cribl Stream** for OpenShift **Kubernetes** clusters, reducing Splunk ingestion by 40-50 GB/day (**\$32K annual savings**) and improving search performance by **20%** across environments

System Engineer May 2020 - Jul 2023
Cerner Healthcare (Oracle Health), Bangalore, India

- Led migration of **500TB+** enterprise healthcare data from on-prem infrastructure to AWS using **Python** and **Bash** scripts and **AWS S3**, reducing storage costs by **30%**
- Participated in 24/7 on-call rotations, triaging P1/P2 incidents and performing **root cause analysis**, reducing mean time to resolution (MTTR) by **35%** through improved runbooks and automated diagnostics
- Troubleshoot **Jenkins** pipeline issues through root cause analysis, minimizing support ticket resolution time by **40%** and ensuring **99.9%** uptime for **CI/CD** workflows, leading to uninterrupted deployment pipelines
- Managed **300+** bi-weekly microservice deployments, using **Chef**, while also tracking them with **JIRA**, accelerating delivery of new UI and backend features in a fast-paced production environment

ACADEMIC PROJECTS

TalkDoc - AI-based Document Filler | Python, FastAPI, React, OpenAI GPT-4 | [GitHub](#) Nov 2025

- Built an AI-powered web application using **FastAPI** and **React** that automates document form completion through conversational interactions, leveraging **OpenAI GPT-4** for natural language understanding and intelligent question generation

Kubernetes-based Data Processing Pipeline Nov 2024

- Engineered a highly scalable data processing pipeline using **Kubernetes** pods for **Apache Kafka** and **Neo4j** that processes **100,000+** NYC taxi records in near-real-time, reducing spatial analytics query time by **60%** and enabling real-time traffic pattern identification

SKILLS

Languages & Scripting: Python, Go, Bash, Java, SQL

Cloud & Containers: AWS, Azure, Docker, Kubernetes, Helm

Infrastructure as Code: Terraform, Ansible, Chef, CloudFormation

CI/CD: Jenkins, GitHub Actions, ArgoCD

Observability: Splunk, Zabbix, Prometheus, Datadog, Grafana

Databases: PostgreSQL, MySQL, MongoDB, Neo4j, Aurora, RDS

AI Agents: Claude Code, Codex, Copilot, Replit

Core Competency: Distributed Systems, Microservices, System Design, Incident Management, Agile/Scrum
